An Open Letter To Our Many Customers

Dear Friend:

This Fall we had not intended to publish a wholesale price list for the simple reason that we were swamped with orders from our wholesale customers (several thousand seedsmen, nurserymen and florists scattered throughout the 48 states). But as the weeks passed we were flooded with requests—even pleas—from the many thousands of retail customers we have acquired over the years.

So this is our answer to these requests. It is not an elaborate catalog with many pretty pictures, and poetic descriptions. It is merely a price list—concise and to the point.

We realize it is a bit late—not to plant (as we have seen tulips planted in March bloom gorgeously in May) — but late from the standpoint of good business, as we know many of you may already have ordered. But we feel that many old and faithful customers are still waiting for this list. And we feel, too, that the wide range of varieties, and the low prices will entice many new customers to try our quality and service.

We wish, also, at this time to thank our many customers for their enthusiastic response to our Spring Catalog. To show our appreciation we are allowing the following **SPECIAL BONUSSES** this Fall. These apply only on the Imported Holland Bulbs on the inside pages, and are as follows:

IMPORTED HOLLAND BULBS • EXHIBITION QUALITY • TRUE TO NAME • ALL TOP* SIZE

★ (Our TOP SIZE means exactly that—the largest money can buy—a full grade above the size commonly offered as first size!)

Tulips are listed in the order in which they bloom — so for week after week of delightful color, start off with the Species Tulips, follow up with Single and Double Early Tulips, then the mid-season Triumph and Mendel Tulips, and finish off with the late May-flowering Darwin, Cottage, Breeder, Parrot and Double Late Tulips.

NOTE: 5 of a variety at ½ the 10 rate; 25 at ½ the 50 rate; but because of the low price—no less than 100 of a variety at the 100 rate.

BOTANICAL (SPECIES) TULIPS

Species tulips present an infinite variety of sizes, shapes, habits, and colors. Originating mostly in Asia Minor, they naturally prefer a warm sunny location. They naturalize easily, and once planted will come up every year. They are fine for the rock garden, or sunny border, and should be planted in clusters of 6 or more.

TRIUMPH TULIPS

The Triumph Tulips are the result of crossing the Single Early Tulips with later flowering varieties, resulting in a strain that is intermediate both in height and flowering time. They are fine for forcing in pots, and favored by many in the garden over Darwins, as the yellow leaves can be removed much earlier in order to prepare the beds for annuals.

Cottage Tulips are commonly thought to be dwarf, early tulips. Actually they are tall-stemmed and bloom late, along with the Darwins, the main difference being that Cottage have oval shaped flowers, whereas Darwins are cup shaped. Included in the Cottage Tulips are the entrancing Lily Flowered Tulips.

GIANT DAFFODILS AND NARCISSI

Little, if anything, can bring to the heart the quiet joy of the dainty, dancing daffodils. They are, when naturalized in vast plantings, a sight to behold. To afford those with sufficient land to plant them freely, we have listed some bulbs that are not Top Size — but are definitely blooming size. But apart from this Special Mixture, all bulbs are TOP SIZE, which means DOUBLE NOSE NO. 1 — the largest and best obtainable!

NOTE: 5 of a variety at ½ the 10 rate; 25 at ½ the 50 rate.

This small ad has been appearing for years in the leading horticultural magazines, and amazing each year our sales, instead of decreasing, have been increasing. The reason? Well, our files show that many customers re-order year after year, and spread the word amongst their friends. Since many of our customers do not subscribe to these magazines, we are repeating this ad here. These bulbs, naturally, are not Top Size, but all bulbs are guaranteed to be blooming size, true to name, free from disease, and to satisfy in every respect.

AMARYLLIS HATHOR

(Brunsvigia Hathor)

Perhaps the most beautiful white Amaryllis, producing 8 to 15 flowers in late summer or early fall.

- ☐ **\$5.00 each**

BROMELIADS

Actually members of the Pineapple family, these interesting foliage plants are not nearly as widely known as they deserve. The flowers come mostly in fascinating pastel shades, accentuated by the vividly colored bracts that cover the scape. They also make desirable foliage plants, as the leaves form rosettes — brightly colored, striped or mottled.

The flowers are borne in gigantic umbels, bright orange-red in color, and long lasting. These are not imported plants, but large specimen plants from the famous Diener collection. All blooming size.

- ☐ **\$5.00 each**

CRINODONNA CORSI

A hybrid between Crinum Moorei and Amaryllis Belladonna. Clear pink flowers in the fall.

- ☐ **\$5.00 each**

CRINUM

Crinum is the Greek name for lily, and these bulbs are so named because of their large, long trumpet-like flowers which resemble lilies. These Amaryllis are of great beauty and of great value as cut flowers. Huge spikes carry 10 to 12 large blooms, which may be cut separately and used to advantage in floral work. Also suitable for pot culture.

- ☐ **C. Cecil Houdyshel.** Deep rose-pink. Everblooming from spring until fall. The best.
